Title of study: Low-cost and open-source sensors for farm water management: co-development for a wide adoption among farmers

Investigator: Crystele Leauthaud

Sub-investigator: Grey Ingersoll

Introduction and Purpose

You are being invited to join a research study.

The purpose of this study is to see if the development of new ways to monitor irrigation using Agricultural Technology (AgTech) is useful for growers, how it should be developed and the impact of its development.

If you agree to be in this research, you will be asked to either i) respond to questions relative to your irrigation reasons and methods in an interview; or ii) participate in focus groups or workshops relative to irrigation methods and decision making tools, or iii) evaluate changes in your irrigation system through the use of new tools, devices or methodologies; or iv) respond to online surveys; v) provide your expert opinion on irrigation systems, devices and uses as a key informant, in an interview.

Your taking part in this research should take about 1 hour (interview) or 3 hours (focus groups/workshop), one week in total (in-situ monitoring) or 20 min (online surveys).

The interview, focus group and workshops will be audiotaped/videotaped and transcribed, but your name will not be included on the transcription.

There is no direct benefit to you from taking part in this study. We hope that the research will help develop new irrigation systems better suited to growers in California as well as extend the scientific knowledge on these systems.

The risks of this research are minimal. Some of the questions might make you feel uncomfortable or upset. You do not have to answer any of the questions you do not want to answer.

Confidentiality

As with all research, there is a chance that confidentiality could be compromised; however, we are taking precautions to minimize this risk. Your responses to the survey, interview, focus groups and workshop questions will include information that identifies you. This identifiable information will be handled as confidentially as possible. However, individuals from UC Davis who oversee research may access your data during audits or other monitoring activities.

To minimize the risks of breach of confidentiality, we will store all data in an anonymized manner on password protected online and on computer storage devices, limit access to the information to investigators of this study, and destroy audio and video recordings after transcription.

Do not write below this line. For IRB stamp and version date only.

We will use your information to conduct this study. Leftover data collected for this research may also be used for future research studies. We will not share any personally identifiable information. Our goal is to make more research possible. These studies may be done by researchers at this institution or other institutions, including commercial entities. Data may be placed in one or more external scientific databases for access and use. We will not ask you for additional permission to share de-identified information.

Compensation

To thank growers for participating in the interviews and in-situ monitoring of this study, growers will receive an electronic \$75 Amazon gift card after they complete the survey by email.

Participants doing focus groups, workshops, online surveys or key informant interviews will not be paid for taking part in this study.

Rights

Taking part in research is completely voluntary. You are free to decline to take part in the project. You can decline to answer any questions and you can stop taking part in the project at any time. Whether or not you choose to take part, or answer any question, or stop taking part in the project, there will be no penalty to you or loss of benefits to which you are otherwise entitled.

Protection of privacy. You can request to place limits on whom you interact or to whom you provide personal information.

Questions

If you have any questions about this research, or you believe that you've been injured or harmed as a participant of this research, please contact the investigator at 831 713 9229 or cleautha@ucsc.edu.

If you have any questions about your rights or treatment as a research participant in this study, please contact the UC Davis, Institutional Review Board by phone: 916 703 9158 or by email: HS-IRBEducation@ucdavis.edu.

If you agree to take part in the research and allow the interview to be recorded, please give verbal consent or click on the Accept button below.
